EDUCATION:

North Carolina Agricultural and Technical State University

- B.S. in Computer Science

SKILLS

Frameworks:

- React, Next.js, TailwindCSS

Languages:

- Javascript, Python, Java, HTML, CSS

PERSONAL PROJECTS:

Entertainment App

- Movie and TV search app built with Next.js and TailwindCSS that leverages the TMDb API to provide users with an immersive search experience. Users can easily search for older, trending, popular, or upcoming movie and TV data.

Dictionary App

- A dynamic dictionary website built with React and Dictionary API, equipped with a user-friendly theme and font toggler, and the convenience of pronunciations with just a click.

GitHub User Search App

- GitHub user search website built using React and the GitHub API. Users can easily search and view a specific GitHub user's profile information, including their repositories, followers, and following.

WORK EXPERIENCE:

Target | Target Security Specialist March 2023 – Present

- Lead a physical security culture for team members and guests by maintaining safe and secure standards throughout store.
- Be a driving force in executing shortage action plans to minimize merchandise shortages in focus areas.
- Collaborate with neighboring stores to report incidents using industry case management systems efficiently and effectively.

Target | Tech Consultant May 2021 – March 2023

- Boost sales through technology recommendations based on current trends and market analysis resulting in the department ranking number one in the district.
- Provide rigorous attention to detail in the coordination and prioritization of departmental tasks.
- Enhance customer experience by ensuring product availability and attractive presentation.
